Dr. Nadine Moeller will discuss geomorphological and archaeological data from recent fieldwork conducted at the ancient cities of Tell Edfu and Dendara in Upper Egypt. The data provides new insights into the evolving landscape of the dynamic floodplain and its influence on the long-term development of these early urban centers. This presentation will also examine the layout and organization of the respective town quarters at Edfu and Dendara. Dr. Nadine Moeller is Associate Professor of Egyptian Archaeology, The Oriental Institute / Department of Near Eastern Languages and Civilizations, University of Chicago.

The King Khufu's Harbor at Wadi al-Jarf on the Red Sea and its Link to the Great Pyramid at Giza

Dr. Gregory Marouard will discuss excavations at an exceptional harbor complex from the early Old Kingdom at Wadi al-Jarf along the Egyptian coast of the Red Sea. The presentation will also provide a new overview on some of the recently (2013) discovered papyri, which underline a complex organization and well-structured logistics for the royal projects and expeditions 4600 years ago. Dr. Gregory Marouard is Research Associate in Egyptian Archaeology, The Oriental Institute, University of Chicago.
